PROJECTS

Mediafly (Social Media App) View Project View Code

- Mediafly is a full-stack social media web application.
- **Features:** user accounts with full login & authentication and being able to like and comment on posts. You can also follow other users and delete your profile and your posts.
- Following and Followers page to show which users are following you.
- **Tech Stack:** Node/Express, PostgresSQL, TypeORM, React, Redux, Typescript, SCSS/SASS, Docker, Jest, React-Testing-Library
- **Login: Email:** test@test.com **Password:** password

Drone shop (Ecommerce Store) View Project View Code

- Drone shop is a full-stack e-commerce web application where you could buy electronics.
- **Features:** User accounts with full login & authentication that allows you to save items to your cart and store them in the database which allows you to purchase the items using the PayPal API as the payment method.
- **Tech Stack:** Node/Express, React, Redux, Bootstrap, MongoDB/Mongoose
- **Login: Email:** test@test.com **Password:** password

Content Management App (Trello Clone) View Project View Code

- **NOTE: "Login with Test account" button will only work a couple of seconds after the first click because the server has to spin up.**
- Content Management App is a full-stack Trello Clone.
- **Features**: User authentication with a dashboard so you can create and save multiple boards.
- Each board can create a list that is movable and is saved in the database so when you fetch that board again it remembers its position.
- Each list can create a card that can move a specific card into another list which is saved in the database.
- **Tech Stack:** Node/Express, Typescript, MongoDB/Mongoose, React, Tailwind, Redux
